Public Health Service

Nelson Marlborough
District Health Board

Limited places are available so
please accept or decline promptly

It is strongly suspected that -

FASD affected individuals are
over-represented in the criminal
justice system.

That people working with them have
little or no awareness of this
disability or know they have been
dealing with a victim, witness or
offender affected by FASD.

The presentations we are
offering, while raising
awareness of FASD,
will highlight the importance
of inter-agency support in
achieving improved outcomes.
